WORK EXPERIENCES

2018

Service Technician

Advania

Current employment since 2018. Work consists of troubleshooting hardware related problems of computers and then performing repairs when needed. Also performed various administrative jobs related to replacement units that fell under warranty

2022

Cashier

Sektionen för Informations- och Nanoteknik

While studying I was very involved with the student union. From 2022 to 2023, I was the chapter Cashier, who was the financially responsible person in the chapter. I was also the signatory person for the whole organization together with the chapter president.

2023

Chapter President

Sektionen för Informations- och Nanoteknik

After my year as the treasurer/cashier, I was nominated and elected to be the chapter president. In this role I had to deal with being the outmost responsible person for the chapter. I also had to develop my leadership skills and learn to delegate and prioritize all the different responsibilities that had to be completed for the chapter to remain operational. I was also a key figure in planning the reception, which is a 3-week welcoming event for the approximately 300 new students that start every year.

SHORT ABOUT ME

I am Fredrik, a striving developer passionate about programming and development.

When I am not immersed in programming, you can find me experimenting with graphical design in Photoshop, expanding my musical side by playing piano, or by researching cybersecurity and learning about hacking.
